

# Nuclear energy status in Chile

Jaime Salas-Kurte, PhD Executive Director-CCHEN

July 2021

### **Nuclear applications**

### Nuclear activities in Chile

#### La Reina nuclear center

### Lo Aguirre nuclear center

### **CCHEN** infrastructure

Research Reactor-RECH-1 (<u>La Reina</u>)-5 MW. Research Reactor- RECH-2 (Lo Aguirre)-10 MW. Multipurpose Irradiation Plant-500 Kci. RR-Nuclear fuel fabrication plant. Cyclotron.

Radiopharmaceutical plant.

### **CCHEN** infrastructure

Speed 2 & Plasma Physics Labs.

Fuel cycle facilities: mining-processing-conversion

Health-Agriculture-Hydrology-Environment-Nuclear Activation

RW management facilities.

#### Irradiators.

### Electrical energy situation in Chile----2007

8,670MW-55% of hydraulic power plants reservoir and pass-45% by coal, fuel, diesel and natural gas combined cycle power plants.

#### Evolución de la Generación Eléctrica por Fuente (1971 – 2004)

### Electrical energy situation in Chile----2007

8,670MW-55% of hydraulic power plants reservoir and pass-45% by coal, fuel, diesel and natural gas combined cycle power plants.

Economic growth rate > 4%/year.

Nuclear Hidro

Gae

### Considering Nuclear Power.....

Nuclear energy is not a disposable option and could contribute to the security of electricity supply

### **IAEA framework**

#### **ISSUES-Self Evaluation**

#### Nuclear Infrastructure Issues

#### **National Studies**

- State and Private Sector roles
- N-Regulatory Framework
- Nuclear Fuel Cycle Options
- Impacts and Risks of Core-Electric Generation
- Natural Risks
- Core Regulation Electrical
- Adequacy of the Legal Framework
- Public opinion-perception
- Public opinion-communication

### Considering Nuclear Power.....

#### Final Report-2010

Nuclear energy is not a disposable option and could contribute to the security of electricity supply The nuclear option for electricity generation is experiencing a renaissance in the world. The projected evolution of the national energy sector indicates that Chile -in the most probable scenarios- will require nuclear energy atmid-2020s, to support meeting its economic efficiency targets, security of supply and prices, as well as environmental sustainability.

### Nuclear energy...... March 2011

A DOMEST

**POWER GENERATION BY TECHNOLOGY** 

■ Hydro ■ Solar ■ Wind ■ Biomass ■ Coal ■ Natural gas ■ Oil

## Un país rico en las <u>energías</u> <u>del futuro</u>

![](_page_13_Picture_3.jpeg)

![](_page_13_Picture_4.jpeg)

![](_page_13_Picture_5.jpeg)

### 1.800+ GW

de potencial energético renovable que equivalen a 70 veces la demanda de Chile

![](_page_13_Picture_8.jpeg)

### Nuclear applications

![](_page_14_Figure_1.jpeg)

### **CCHEN R&D organization**

### **R-D CORE**

![](_page_15_Picture_2.jpeg)

Research Reactors and Nuclear Fuel Center.

![](_page_15_Picture_4.jpeg)

RD-Nuclear Research Center for Applications in Health and Biomedicine.

![](_page_15_Picture_6.jpeg)

RD-Center for Nuclear Technologies in Vulnerable Ecosystems.

![](_page_15_Picture_8.jpeg)

RD-Materials Center for Energy Transition and Sustainability.

![](_page_15_Picture_10.jpeg)

RD-Center for Nuclear Physics and Neutron Spectroscopy.

![](_page_15_Picture_12.jpeg)

RD-Research Center on the Intersection of Plasma Physics, Matter and Complexity.

### **MANAGEMENT CORE**

Research & development managementCenter:Problem and TransferCenter/Knowledge Transfer Center.

Liaison and outreach.

#### **TECHNOLOGIES CORE**

**Technology Shared Resources Center.** 

## Some R&D projects

- Use of nuclear techniques (mutagenesis) to improve **adaptation and productivity of forest** species facing climate change.
- Synthesis of Li-S-C nanoparticles for **high-density energy storage devices** by the supersonic thermal plasma expansion method.
- Miniaturized **plasma thruster** for CubeSat nanosatellites.
- Use of low doses of ionizing radiation to study the **hormetic response** in plant species.
- Development of a magnetic nanohydrometallurgical system to **obtain high purity lithium brines**.
- Study and spectroscopic characterization of **cosmic background neutron sources**.
